

## STEP BY STEP INSTRUCTIONS:

- ✓ Follow PRE-TREATMENT for 2 weeks for best results. Dark and pigmented types use FB serum.
- ✓ Apply your TEST patch at least 24 hours prior to peel to check for allergies or excessive irritation..
- ✓
- ✓ Cleanse the skin with a deep cleanser.
- ✓ Apply layer of Prep A (or highest percentage alcohol) and let air dry.
  
- ✓ Pour a small amount of peel solution into medicine cup.
- ✓ Fold a gauze pad in half and dip into solution, saturating pad.
- ✓ Fold gauze in half again and give one GOOD squeeze to remove excess solution.
- ✓ Get a timer and set it for desired peel time. (see chart above).
- ✓ Apply SALICYLIC peel in a horizontal motion across the entire face/neck.
  - Leave solution on for 30 seconds - 1 minute and then ***rinse and pat dry.***
- ✓ Repeat application process with the GLYCOLIC peel.
  - Leave solution on according to percentage and chart.
- ✓ \*A stinging/itching sensation is normal when using the Peel Solution, but a very mild sensation to no sensation at all is also acceptable as individual tolerances differ. Watch for any redness and neutralize acid with a dab of water if necessary.
  
- ✓ When time has ended apply Neutralizer and/or rinse with cool water.
- ✓ Pat skin dry and follow with a plain moisturizer, Hyaluronic 100 or Emu oil are excellent choices. (Now is not the time for any active ingredients a.k.a. glycolic, retinol etc..)
- ✓ \*Make sure that you use a sunscreen with an SPF of at least 30. (Because this product may make your skin more sensitive to the sun, be certain you have adequate sunscreen protection while using this product and for a week afterwards). \*per FDA

## F.A.Q's:

**I think the solution I purchased was too strong for me. How can I lessen the %?** You can lessen the Glycolic percentage by mixing in purified water (in a separate container) by following the formula 2/3 Peel solution Water. You can cut the percentage in 1/2 by mixing equal parts of peel to dilution product. With Salicylic you must use Alcohol to dilute. Questions? Call us (ph# below).

**I do not see peeling, is it still working?** Just because you do not see any visible flaking does not mean the peel isn't working. The acid's job is to dissolve the bond that holds the outermost layers of dead skin to the face. Most of the loosened skin comes off during your daily cleansings. If you skin "feels" smoother, it is working.

**Approximately how many peels will I get from my bottle?** 1oz. = 20 peels, 2oz. = 40 peels.

**Can I use the Salicylic peel on its own?** Yes, you can use the 3% as often as 1x per day as a spot treatment. Excessive dryness may occur.

If you have any medical questions as to whether you should be performing these peels...Consult your physician or dermatologist before you proceed!
